

For this special **20th Annual of Cruisin' on Main** we are looking for all types of show vehicles. We have suspended our cutoff date so any year cars are welcome.

Here are some examples of what we are looking for: show cars, collector cars, muscle cars **or** exotics.

What is considered a **show car**? Some also call them dream cars. Most are custom made cars that are designed just for shows or displays. Not a car or truck that can be bought at a car dealer. Show trucks would also be considered. All custom built vehicles.

What is a **collector car**? The common collector's vehicle is a car with historical interest. A lot of collector cars or trucks that are worth preserving or restoring are mostly 20 year old cars or trucks fall into this class.

What is a **muscle car** you may ask? Well, most early American muscle cars were made in the sixties and early seventies. They were high performance cars designed for mass production. They were also designed with drag racing in mind.

What is an **exotic car**? Well, it is also known as a super car. It is a high performance street legal sports car built between the early 2000's all the way up to today's date.

All year cars are welcome at this special 20th Cruisin' on Main show. Yes, imports are welcome but please no daily drivers unless they fit into one of these classes.
